

MySQL database via MAMP voor Mac gebruikers

Installatie MAMP

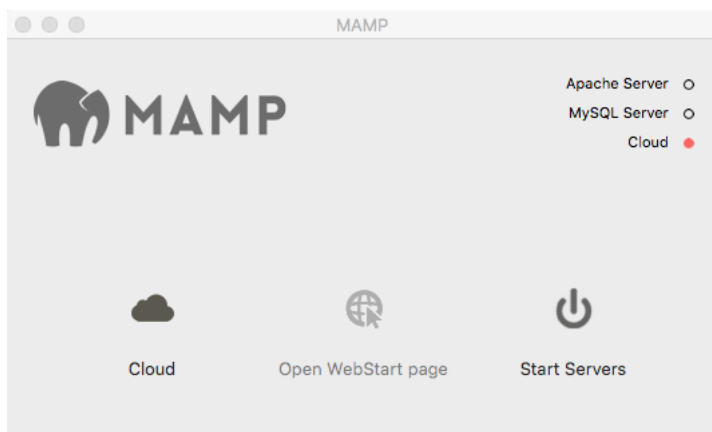

Download MAMP op <https://www.mamp.info/en/downloads/>

Open package MAMP_MAMP_PRO_5.x.pkg en doorloop installatieprocedure.

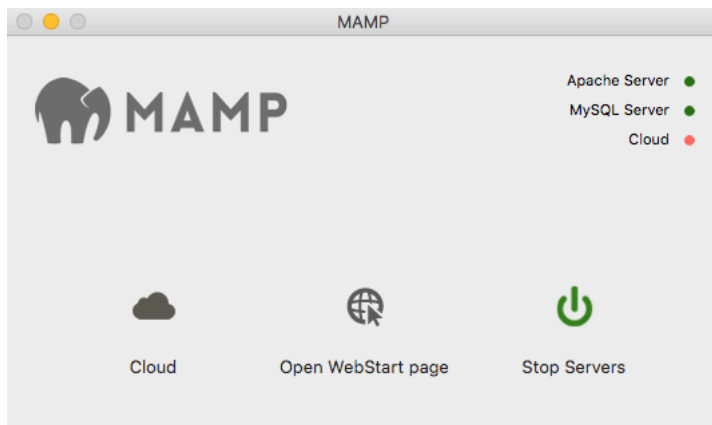

Open MAMP (niet MAMP PRO)

Start Servers

Servers started

Aanmaken database MAMP

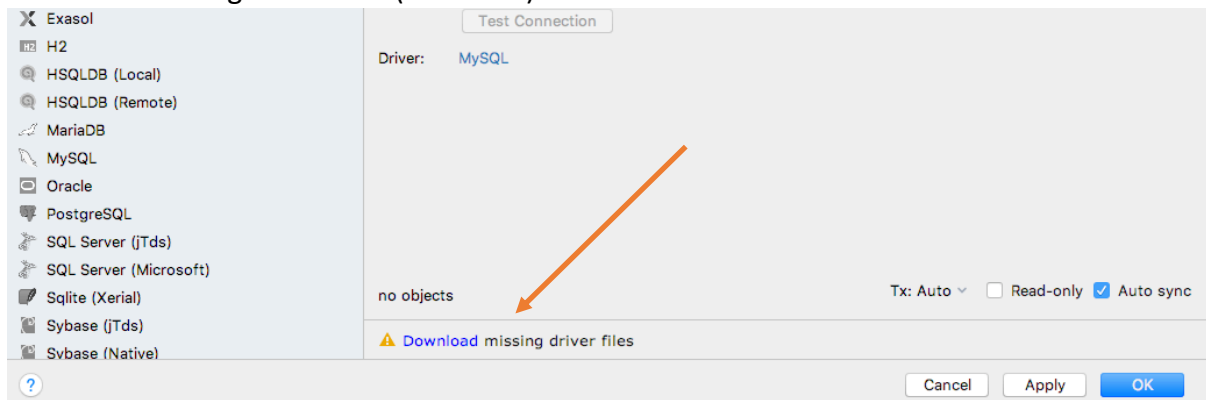

Open IntelliJ

View > Tool Windows > Database

Het Database panel komt tevoorschijn

New > Data Source > MySQL

Download missing driver files (if needed)

Host: localhost

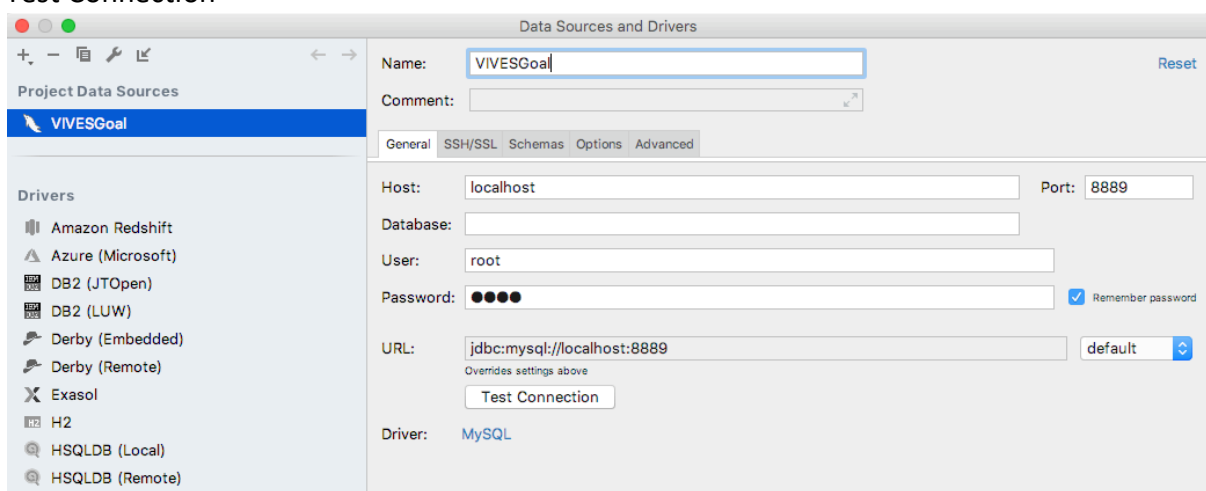

Port: 8889

Database: (leeg laten)

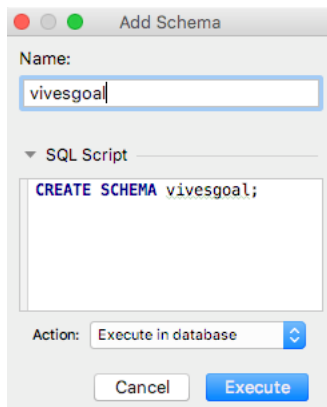

User: root

Password: root

Test Connection

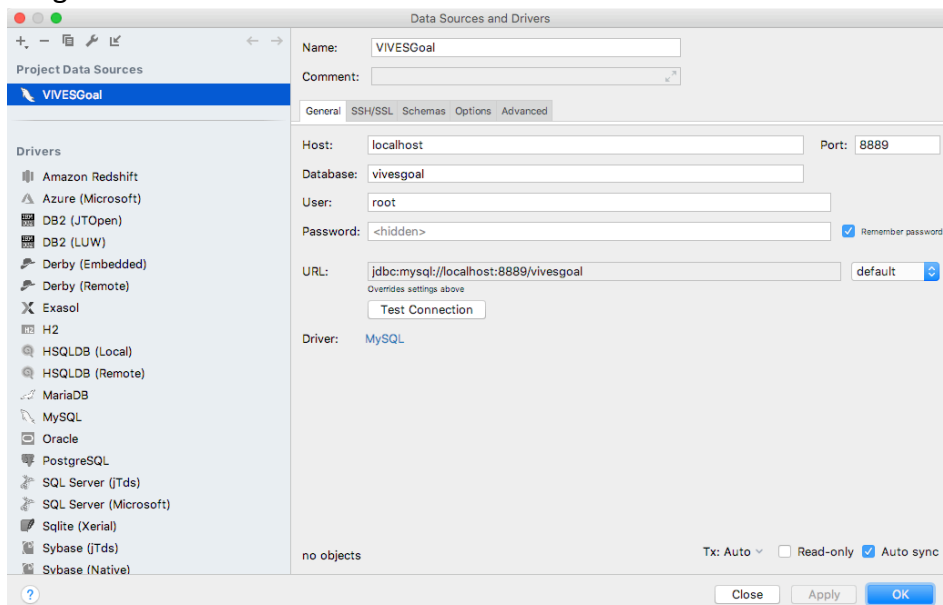

Maak schema livesgoal

Execute

Disconnect je database connectie en pas deze aan om te connecteren naar het net aangemaakte schema

Schema: vivesgoal

Host: localhost

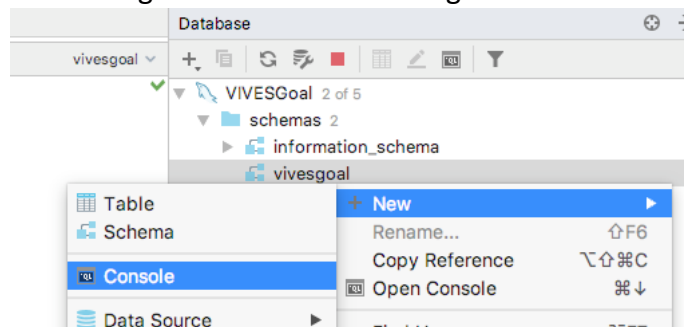

Port: 8889

Database: (leeg laten)

User: root

Password: root

In net aangemaakte schema livesgoal

Kopieer in de geopende console in IntelliJ de SQL-statements die de tabellen aanmaken en voer deze uit.

Resultaat:

Pas DB.properties aan in /resources/database/DB.properties

`dbUrl=jdbc:mysql://localhost:8889/vivesgoal`

`driver=com.mysql.jdbc.Driver`

`login=root`

`paswoord=root`
